

## Session 2: 17:25 – 17:40

### International collaboration in capacity building for clinical trial professionals.

Muchanga Sifa, MD. PhD  
(Regional Manager, National Center for Global Health and Medicine )

#### Short CV

**Dr Sifa**, is the Regional Manager for Africa and training project leader at the Department of International Trials of NCGM.

She works with academic and research institutes located in NCGM-DIT's partner countries to develop capacity building programs for clinical research professionals with respect to local regulatory requirements and international standards including ICH.

She is also in charge of facilitating clinical research between Japanese researcher and researchers in African and European regions.

Sifa is an Obstetrician and Gynecologist, Associate Professor of Medicine at University of Kinshasa, in DRC.

She is Research Fellow in the Japan Environmental Children's Study (JECS) at Kochi University, Japan.

#### Abstract

Since its establishment in 2016, the International Trials Department has made it a priority to promote clinical research activities in Asia and Africa by conducting training activities for the improvement of human capabilities on conception, implementation and management of clinical research activities.

We had developed an adaptative model of training that considers a holistic knowledge sharing from on-site training to hybrid, personalized, customized and needs oriented training program.

The NCGM-DIT is continuing to foster capabilities of researchers located in its partner institutions using a collaborative and participative approach.
